WorkDey

Talent, found. Careers, built.

A calm, data-forward identity for a three-sided platform: one grammar for job seekers, employers and the team running WorkDey. All names, listings and figures on these boards are illustrative placeholders.

MARK AND LOCKUP

WorkDey

WorkDey

WorkDey

A K whose upper arm ends in a node: a person meeting an opportunity.

THREE WORKSPACES, ONE GRAMMAR

Talent

Warm and encouraging. Matches, progress and next steps.

Employer

Precise and efficient. Pipelines, volumes and decisions.

Admin

Dense and controlled. Dark by default for long sessions.

DESIGN PRINCIPLES

1. **Calm over clever.** One accent per workspace; colour signals meaning, not mood.
2. **Data is the decoration.** Charts, scores and progress rails carry the visual interest.
3. **Evidence before hype.** No invented logos or stats; sample data is always labelled.
4. **Local roots, global grammar.** XAF and Cameroonian cities inside conventions any international team knows.

REFINEMENT · MOTION

Motion system

Motion explains what changed, where it went and what is possible next. It uses transform and opacity only, starts fast and settles gently, and gets quieter the closer a screen is to daily work.

Note on research. motionsites.ai could not be opened from this environment (outside the allowed sites), and search returned only third-party listings I did not read. So this system is built from your brief and from established motion practice, not from direct observation of that site. Demos below loop for specification only. Real screens play each animation once.

1 · THREE INTENSITIES

Expressive · public

Landing, Jobs, About, Employer profile.

Staggered hero entrance (24 px rise, 640 ms), highlight draw, layered product cards with one gentle float, arrow nudges on buttons, and scroll reveals in the live site.

Restrained · talent and employer

Dashboards, pipeline, coach, forms.

One 320 ms entrance per section (8 px rise, 40 ms stagger), progress bars that fill once, card hover with border and shadow only, focus rings, soft modal and menu appearances.

Instant · admin

Queues, tables, audit, AI settings.

Opacity-only 180 ms page fade, 120 ms hover and status changes, no travel and no stagger. Nothing delays a reviewer from acting.

2 · TOKENS

Durations

instant 100 ms	press, tap feedback
fast 150 ms	hover, focus, colour change
base 220 ms	menus, tabs, tooltips
slow 360 ms	modals, section entrance
hero 640 ms	public landing only
stagger 40 / 80 ms	app / public, maximum 6 steps

Exits are about 70% of the entrance time. Nothing in the product runs longer than 800 ms.

Easing curves

out
.22, 1, .36, 1
Entrances, reveals, fills

in-out
.65, 0, .35, 1
Movement across the screen

in
.4, 0, 1, 1
Exits only

pop
.34, 1.56, .64, 1
Success marks only

3 · LANDING CHOREOGRAPHY (LOOPS HERE, PLAYS ONCE LIVE)

Hero sequence

Matches that show their reasoning.

Search jobs →

Badge 0 ms, headline 80, description 180, search 300, links 400. Highlight draws at 700 ms. One card floats 5 px over 7 s. The product preview layers in after the text, so the eye reads the promise first and the proof second.

Scroll reveal and parallax

Specified behaviour for the live site: sections rise 24 px as they enter, finishing when 30% of the section is visible, and show immediately where scroll-linked CSS is unsupported. The canvas boards show every section at rest, so nothing is hidden.

No parallax on text. Only the decorative K watermark and grid may drift, at most 24 px, and only on pointer devices wider than 1024 px.

The footer never animates, so the page always ends on solid ground.

No statistics count up, because there are no real statistics yet. When there are, counters run once over 800 ms with a tabular-number font to avoid layout shift.

4 · MICRO-INTERACTIONS AND COMPONENTS

Button hover and press

Get started →

Hover this one. Colour 150 ms, arrow shifts 3 px, press moves 1 px down in 100 ms.

Card hover

Senior Data Analyst
Savanna Agritech · Douala

Hover this one. Dashboards use border and shadow only. Public pages add a 2 px lift.

Input focus

Job title or skill

Click into it. Border and a 3 px ring in 150 ms. The ring never shifts layout.

Tab indicator

Overview Applicants Pipeline

The underline slides between tabs in 220 ms. Content cross-fades in 150 ms with no travel.

Dropdown and mega menu

Find jobs ⌄

Opens in 180 ms from the trigger edge: 6 px drop and 98% scale. Closes in 120 ms. Escape and outside click close it.

Modal

Scrim fades 220 ms, panel rises 16 px and settles 98% to 100%. Focus moves in on open and returns on close.

Progress fill

Skills 92
Experience 80

Bars fill once with scaleX over 600 ms when a card enters. Numbers are static, so nothing jitters.

Pipeline status change

SCREEN INTERVIEW

Ruth Fomum
87%

A moved card glides 360 ms, then the new stage badge cross-fades. Counters tick with a 150 ms fade.

AI coach: thinking and reply

Replies appear in whole sentences, each fading in over 220 ms. No typewriter effect, so people can read at their own speed.

Three-dot wait appears after 300 ms of silence only. Skeleton lines pulse opacity from 50% to 100%.

Loading skeleton

Shapes match the final layout, so nothing jumps when content arrives. Opacity pulse, no sliding shine.

Success and error

Add a salary range

Success mark pops once and the tick draws in 360 ms. Errors never bounce: the field border turns red in 150 ms and a message fades in below.

Toast and notification

Slides 24 px in from the edge in 220 ms, stays 5 s, fades out in 150 ms. Pauses while hovered or focused.

Status badge change

Pending review

Badges cross-fade in 150 ms. In admin tables the row also flashes a pale tint for 400 ms.

Reduced motion

When the system asks for reduced motion: all travel, scale, float and parallax are removed; entrances become a plain 150 ms fade or an instant show; progress bars show their final value; looping animations stop; scroll-linked reveals are turned off. State changes keep colour or icon changes, so feedback is never lost.

Performance and accessibility rules

Animate transform and opacity only. No blur animation, no animated shadows over large areas, no layout properties. One continuous loop per screen at most (the landing float), paused off-screen. Mobile drops stagger to 3 steps and removes the float. Animations never block input: controls are usable from the first frame. Focus order and screen-reader content do not depend on animation finishing.

Where it is applied

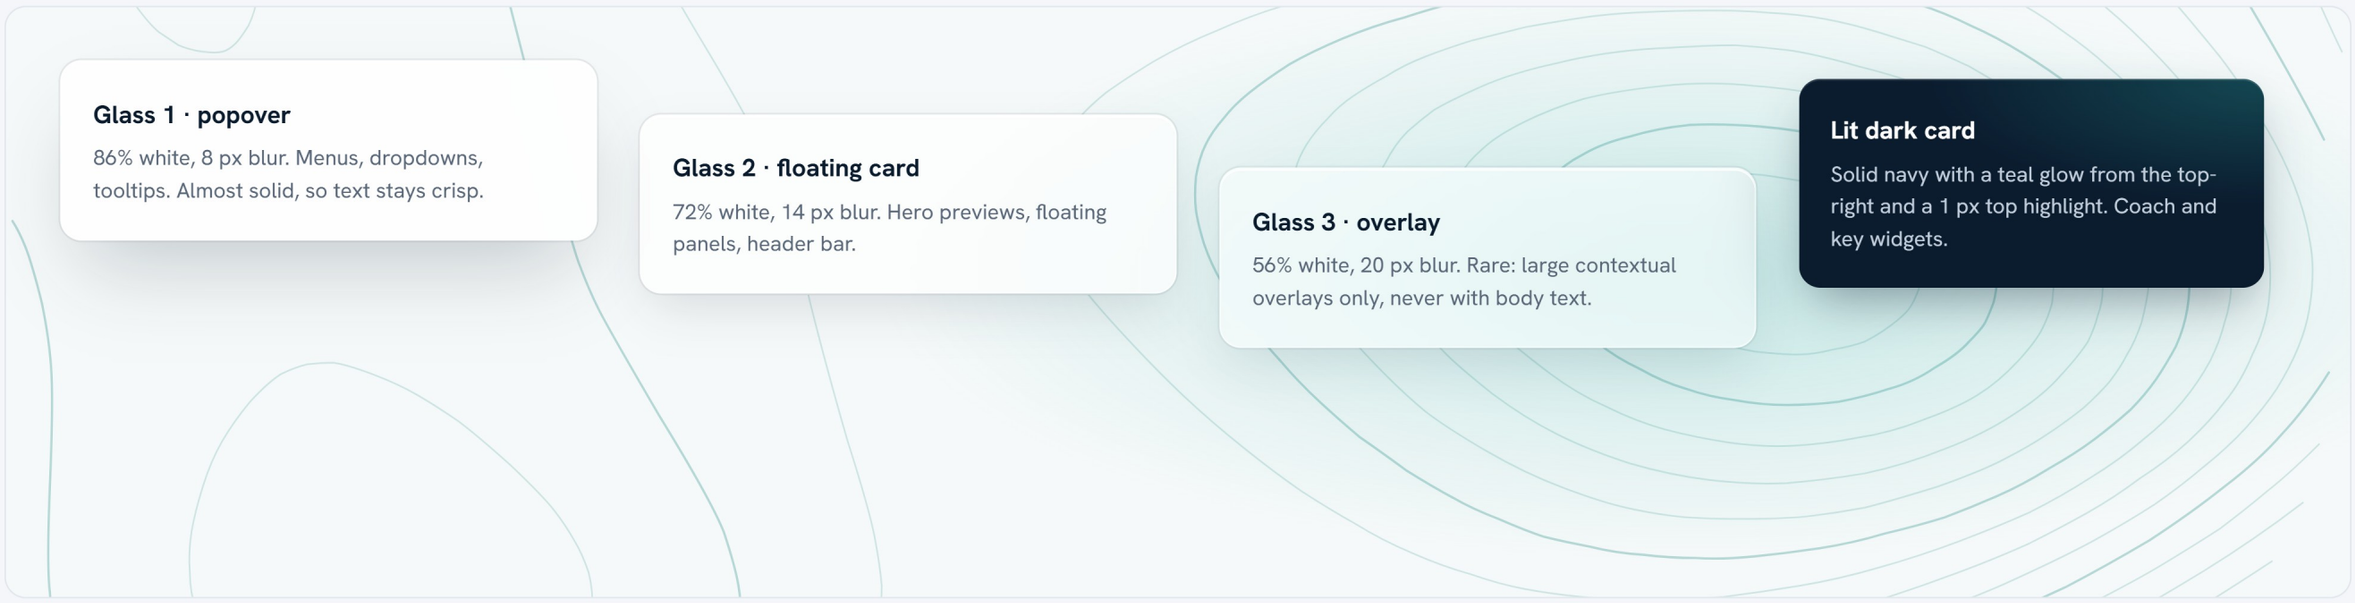
Landing, Jobs, About and Employer profile: expressive. Talent and Employer screens: restrained entrances, hover, progress and focus. Admin screens: instant. Mobile boards: tab pills, press scale and a short content rise. Open any board in the canvas to see it play on load.

REFINEMENT · MATERIAL

Glass, light and depth

Glass creates depth, lighting creates atmosphere, and the interface underneath stays clear. Glass is reserved for things that float over other things. Anything you read in bulk stays solid.

1 · GLASS LEVELS (OVER THE HERO CONTOUR BACKGROUND)



Material tokens

TOKEN	VALUE	USE	ADMIN (DARK)
glass-1	white 86% · blur 8 · border white 70%	Popovers, dropdowns, mega menu	navy 80% · border white 10%
glass-2	white 72% · blur 14 · border white 70%	Hero cards, floating panels, header	navy 66% · border white 10%
glass-3	white 56% · blur 20 · border white 60%	Large overlays, no body text	navy 50% · border white 8%
edge	inset 1 px white 90% + 1 px ring navy 7%	Top highlight and outer hairline on every glass surface	white 8% highlight
e1 to e4	1/2 · 4/12 · 12/28 · 24/48 px blur, navy 5 to 22%	Rest, raised, floating, overlay. Negative spread keeps shadows tight	black 40 to 60%
glow-teal	1 px ring 18% + 8/24 px halo 38%	Primary CTA, selected card, active nav	lighter teal #2DC4B6
glow-blue	same, #2552C2	Employer workspace equivalents	lighter blue
glow-amber	same, #E8A317	Admin active nav and key badges only	same
ambient	radial, teal 7 to 28%, no animation	Behind hero cards, top-right of workspaces	teal 10%

Elevation

e0
Flat. Table rows, form fields.

e1
Resting cards.

e2
Hover, raised.

e3
Floating panels.

e4
Menus, modals.

Light comes from the top left. Highlights sit on top edges, shadows fall down and slightly right.

Primary CTA, rest and hover

Get started → Hover

Workspace accents

Post a job Review queue

Selected card

Senior Data Analyst
Savanna Agritech

Active navigation

Dashboard

Input focus

Douala

Admin: live status

All systems operational

Use glass for

Hero preview cards, the sticky public header, dropdowns and the mega menu, notification popovers, modal panels over a scrim, and floating contextual hints.

Keep solid

Job listings, tables, forms, candidate review, settings, audit logs, and any card with dense text. These carry only elevation and hover, never blur.

By workspace

Public: full material with glass and ambient light. Talent and employer: lit dark cards, glowing active states, progress glow. Admin: glow on live status and active nav only, with solid dark cards for clarity.

Performance and accessibility

At most three blurred surfaces are visible at once, and none are large: the header bar and two hero cards. Blur radius is capped at 20 px and never animated. Glows are single radial gradients and box-shadows, never filters, and nothing pulses. On phones, blur is removed and glass becomes 90% white. Browsers without backdrop-filter, and users who set reduced transparency, get a plain solid surface with the same border and shadow. Text on glass is always the standard dark ink on 70% white or better, so contrast stays above 7:1.

Theme scope

Only the admin console has a dark theme. Public, talent and employer screens are light only, so their glass is always white-based. In admin, surfaces are solid dark navy with a white 8% top highlight, and light comes from amber (#E8A317) and soft green status glows. Admin avoids blur entirely for clarity.

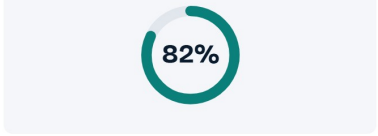
HOW IT WORKS

From profile to offer, in three clear steps

Talent Employers



STEP 1

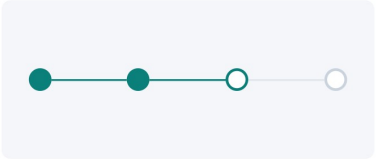
Build a profile that works

Add skills, experience and preferences. Import a CV and review what we found.

STEP 2

See why each role matches

Every score comes with its reasons and gaps, so you know where to focus.



STEP 3

Apply, track and grow

Follow every application, prepare with the coach, and keep building your roadmap.

Built for both sides of hiring

Two focused workspaces, so each side sees exactly what it needs to decide.

FOR TALENT

A profile that keeps working while you do

- Personalised matches, each with the reasons behind it
- Application tracking from sent to offer
- A career roadmap and skills assessment you can act on
- Local, remote and international roles in one place

Create a talent profile → Free · about 5 minutes

FOR EMPLOYERS

A pipeline, not a pile of CVs

- Publish roles in minutes with structured requirements
- Ranked applicants with transparent match notes
- Shared pipeline, interview scheduling and team notes
- Recruitment analytics that show where hiring slows

Start hiring → Verification takes about 1 working day

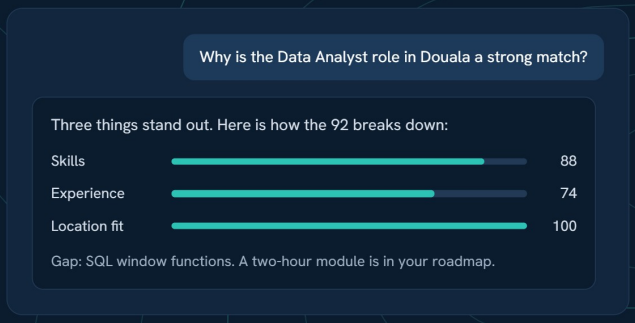
AI CAREER COACH

Guidance that shows its work

Every recommendation comes with its reasoning, so you can trust it, challenge it, or ignore it. AI informs the decision; people make it.

- Match scores break down into skills, experience and location fit
- Talent controls which profile details the AI may use
- Employers review every shortlist; nothing is rejected automatically

Try the coach with a free profile →



Rooted in Cameroon. Open to the world.

Browse roles by city, region or work style. Salaries show in XAF, with room for more currencies as WorkDey grows.

ABOUT WORKDEY

Hiring should reward ability, not connections.

WorkDey helps people in Cameroon find work that fits and helps employers find people who thrive, with AI that explains itself and humans who make the final call.

Explainable matching

Every score breaks down into skills, experience and location, so both sides can see why.

Verified employers

Organisations are reviewed before posting, and every listing is checked for scams and unfair wording.

People decide

AI recommends and prepares. It never rejects a candidate or makes a hiring decision on its own.

Built in Cameroon, ready to go further

We start with Cameroonian cities, English and French, and XAF salaries. The same foundations support new countries, currencies and languages as WorkDey grows.

OUR PRINCIPLES

01 Transparency over black boxes

02 Privacy controlled by the candidate

03 Fair access for every region and background

04 Careers are long; we support the whole journey

Ready to start?

Free for talent. Employers are verified before they can post.

Career coach

Interview prep · Senior Data Analyst, Savanna Agritech

New chat

My interview is on Tuesday. What will they probably ask, and where am I weakest?

Based on the job description and your CV, expect three themes. I have ranked them by how likely they are to come up.

1. **Forecasting under uncertainty.** They model yield and demand. Prepare one example with real numbers.
2. **Leading junior analysts.** The role mentors two people. Bring a story about unblocking someone.
3. **SQL window functions.** Your weakest area against the listing. A short practice set is ready.

Start mock interview | Open SQL practice | Draft my intro answer

Based on your profile, CV and this job listing. AI can make mistakes; check anything important.

Let's do the mock interview, starting with forecasting.

Preparing your first question

Ask about interviews, skills, salary or your next move

AN

Aïcha Nkeng

Data analyst · Douala, Littoral · 6 years experience

Shortlisted · Open to hybrid · English · French

Schedule interview | Move stage ▾ | Decline

CV | Cover note | Assessments | Team notes 2

SUMMARY

Analyst with six years turning operational data into decisions across agriculture and retail. Comfortable leading small teams and presenting to leadership in English and French.

EXPERIENCE

Data Analyst · Cacao Route SARL 2022 – present
Built supplier reporting in Power BI; reduced monthly reporting time with automated pipelines.

Junior Analyst · Kadji Retail Group 2020 – 2022
Weekly sales and inventory analysis across eight stores.

EDUCATION

BSc Statistics · University of Douala · 2019

SKILLS

SQL · Python · Power BI · Forecasting

92 **Strong match**
Explained, not decided. You choose.

Skills	88
Experience	94
Location	100

Possible gap: no listed experience with SQL window functions.

Team notes

Françoise M. · yesterday
Strong reporting portfolio. Ask about mentoring.

Jean-Eric T. · Mon
Salary expectation inside range.

LAYOUT DECISIONS

Sidebar becomes tabs. Five bottom tabs per workspace; the rest sits under More.

Detail pages split. List, then full-screen detail with a sticky primary action.

Kanban becomes stage chips. One column at a time with swipe between stages; drag is replaced by quick-action buttons.

Tablet (768 to 1024). Sidebar collapses to an icon rail; list and detail sit side by side.

Admin stays desktop-first. Mobile offers read-only queues and approvals only.

Targets. 44 px minimum touch areas; salary and score figures never truncate.

STATES

Empty, error and loading states

Every state explains what happened, reassures, and offers one next action. Admin states are the only dark ones.

Empty: first use

No applications yet

When you apply, you can follow each step here.

Find jobs →

Say what belongs here, then offer the one action that fills it.

Empty: no search results

No roles match "actuary"

Try fewer filters or a nearby city.

Clear filters

Always offer a way back. Suggest broader terms, never a dead end.

Empty: employer pipeline

Your pipeline is empty

Publish a role to start receiving applicants.

Post a job →

Uses the workspace accent colour.

Error: failed to load

We could not load this page

Check your connection and try again. Your data is safe.

Try again

Plain language, reassure about data, one retry action.

Offline

You are offline

Changes will save when you reconnect. Drafts are kept on this device.

Appears as a top banner in the app, not a blocking screen.

Not found (404)

404

This page is not here

It may have moved or the role has closed.

Back to jobs →

Closed roles get their own message: "This role is no longer open", with similar roles.

No permission

You do not have access

Ask an admin to grant the role needed for this page.

Request access

Names the fix, never just "403".

Form validation

Salary range (XAF)

650,000

Add a maximum, so candidates see a full range.

Error sits under the field with an icon or text, never colour alone. Focus moves to the first error.

Loading

Skeleton matches the final layout. Opacity pulse only.

Success

Application sent

We will tell you when the employer views it.

View application

Confirms the result and shows what happens next.

Admin: confirm destructive action

Suspend this account?

The user will be signed out and cannot apply or post. This is logged.

Cancel Suspend

Destructive buttons are red and never the default focus.

Admin: empty queue

Verification queue is clear

New requests will appear here.

Positive empty state for queues.

STATES, CONTINUED

More states and edge cases

The twelve base states cover empty, error, loading and success. These cover the edges: connection loss, expired sessions, permissions, accounts and plans, unavailable AI, upload failures, long content and French text.

Connection and session

Offline, with queued work

You are offline. Showing what was saved at [time]. Anything you send will go out when you are back online.

Senior Data Analyst
Savanna Agritech · Applied [date] — Interview

Operations Coordinator
Harbor & Co. Logistics · Draft — Waiting to send

Search and new matches need a connection.

Keep reading and drafting working offline. Show exactly what is queued so nothing feels lost. Clear the banner on its own once the connection returns.

Slow connection and retry

Reconnecting. This is taking longer than usual.

Sending application… | Cancel

After 20 seconds: “Still trying. Your application is saved.” with Try again.

Never double-submit. Disable the primary action while sending, keep Cancel available, and promise only what is true: the draft is saved.

Session expired

Please sign in again

For your security, we ended your session after a period of inactivity. Your draft is saved.

Sign in

Return people to the same screen after sign-in, with their draft intact. Admin sessions expire sooner and say so.

Too many attempts

Email

aicha@example.com

Too many sign-in attempts. Try again in 5 minutes, or reset your password.

Sign in | Reset password

State the wait and the alternative. Do not reveal whether the email exists.

Access, account and plan

Permission denied, in context

Billing and plan — Owners only

Your role is **Recruiter**. Only organisation owners can change billing.

Ask [owner] for access

Say which role is needed, name who can grant it, and give a one-tap request. Hide nothing the person can still read.

Account paused

Your account is paused

We paused your account on [date] after reports about [policy area]. You can still download your data and your applications are kept.

Appeal this decision

Contact support

Reference [case-id]

Give a plain reason, a reference and a real way to appeal. Keep data export available.

Employer not yet verified

Verify your organisation to publish

1. ✓ Organisation details added
2. Upload registration document
3. Wait for review, usually [—]

Continue verification

Save draft

Drafting still works. Block only the publish step and show the shortest path to unblock it.

Plan limit reached

Active jobs — [n] of [limit]

You have reached the active job limit on your plan. Close a job or change plan to publish another.

Close a job | View plans

Warn at 80 percent. At the limit, offer both ways out. Never show prices here, link to the plans page.

Service, files and dialogs

AI service unavailable

Career coach — Unavailable

The coach cannot answer right now. Your earlier conversations are safe.

Try again | Open my roadmap

Match for BI Analyst — Not available

AI is advisory, so every AI surface needs a plain fallback: the core task continues without it.

Scheduled maintenance

Maintenance on [date], [start] to [end]. You can read but not apply or post during this time.

BI Analyst
Aurelia Bank · Douala — Apply

Write actions are disabled and say why on hover and focus.

Announce early, state the window, switch to read-only rather than failing mid-action.

CV upload problems

cv-final.pdf
This file is larger than [limit] MB. Compress it or choose another.

portfolio.pages
This type is not supported. Use PDF or DOCX.

scan.pdf
We could not read this file. Try another, or enter details by hand.

Choose another file

Name the file, the cause and the fix. Always offer the manual route so nobody is stuck.

Unsaved changes

Leave without saving?

Your changes to “Senior Data Analyst” will be lost.

Keep editing | Discard

Destructive action is named and never the default focus. Escape closes and keeps editing.

Undo toast

3 candidates moved to Rejected. Undo

Stays 8 seconds, pauses on hover and focus, announced politely to screen readers.

Prefer undo to confirm for reversible actions. Use a dialog only when it cannot be undone.

Content stress tests

Long titles and names

Responsable Principal de la Planification Stra…
Société Camerounaise de Distribution et de Logistiqu… — 92%

BI Analyst
Aurelia Bank · Douala · Hybrid — 92%

Jean-Baptiste Emmanuel Ngono Essomba-Tc…
Candidate · Yaoundé — 92%

One line with an ellipsis in lists. The full text is always shown on the detail page and on hover or focus. The match chip never shrinks.

Many skills and long strings

SQL | Power BI | Python | Forecasting | Data modelling | +7 more

https://www.exemple-entreprise.cm/careers/senior-data-analyst/application/very-long-reference-code-000000000000000000

Show at most five chips, then a count that opens the rest. Long strings and links break at any character rather than widening the card.

Multi-line descriptions

About the role

You will build and maintain dashboards for the regional finance team, work with data engineers on the warehouse, and present monthly findings to leadership. You will also coach junior analysts

Read more

Clamp at three lines with a visible “Read more”. Never clamp without a way to expand.

Email rules

- ✓ 600 px wide, single column, one primary action
- ✓ Body 16 px or larger, buttons 44 px high
- ✓ System font stack in email; brand fonts are not reliable
- ✓ Always a plain-text version and real alt text
- ✓ Works in dark mode: no transparent logos on light-only backgrounds
- ✓ Subject under 50 characters, preview text always set
- ✓ Sent in the language chosen in the account (EN or FR)
- ✓ Footer: why you got this, preferences, unsubscribe, legal address
- ✓ No tracking claims, no fake urgency, no invented numbers

Applies to every transactional and digest email.
